## Food and agriculture systems are not working for the people or the planet:

They contribute
One third of the
global GHG
emissions

They threaten 86% of at-risk species

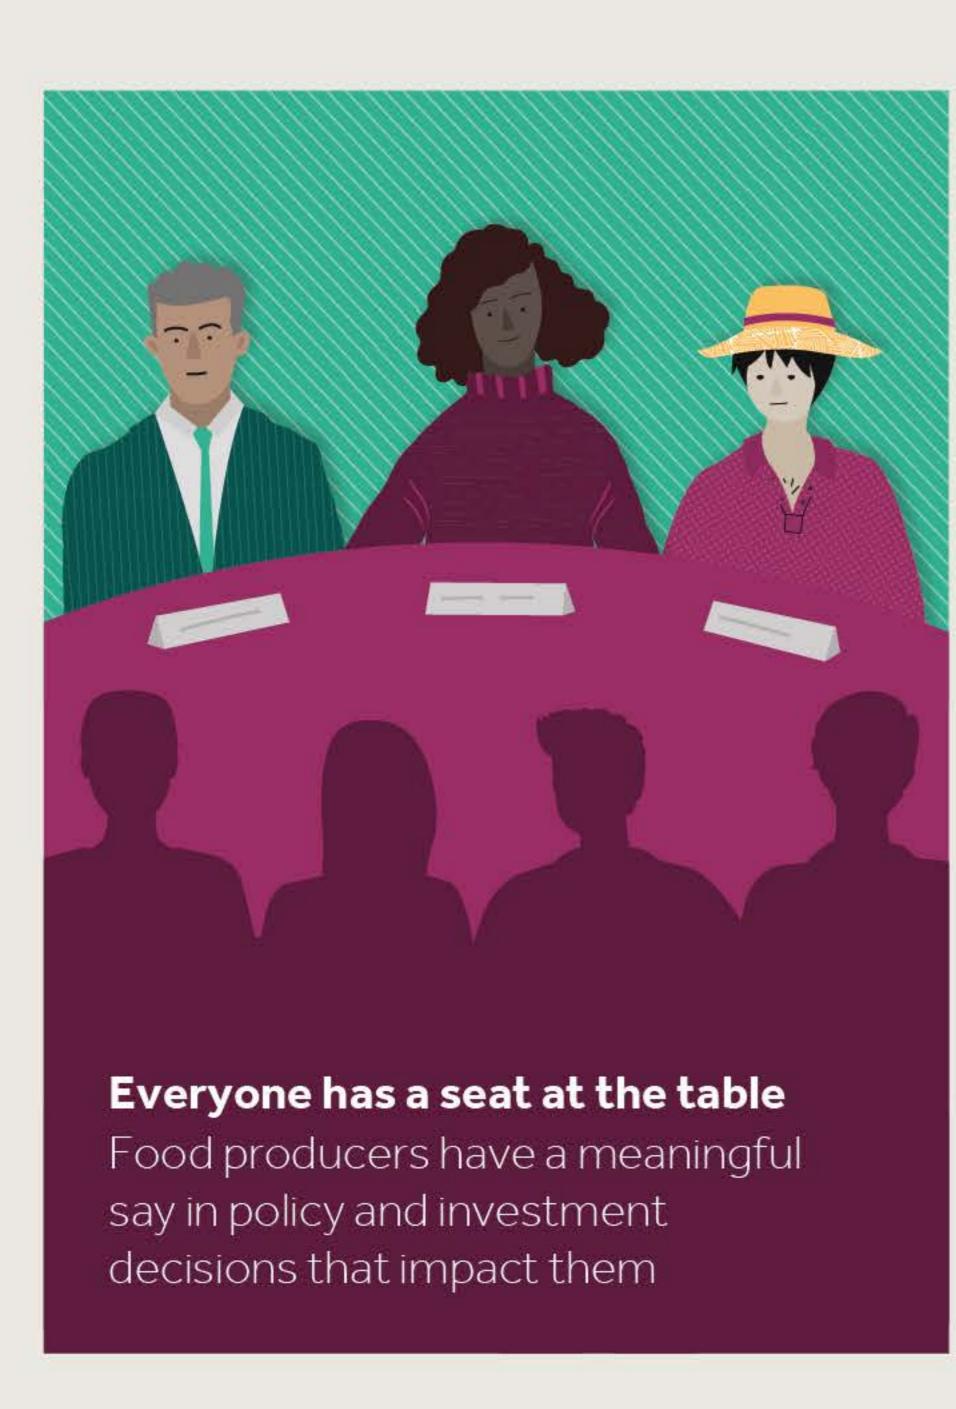

2 billion people suffer from hunger and obesity-related malnutrition

Farmers and their communities make up 2/3 of those in extreme poverty

## We need a just rural transition — ensuring that efforts to transform food systems are inclusive and equitable

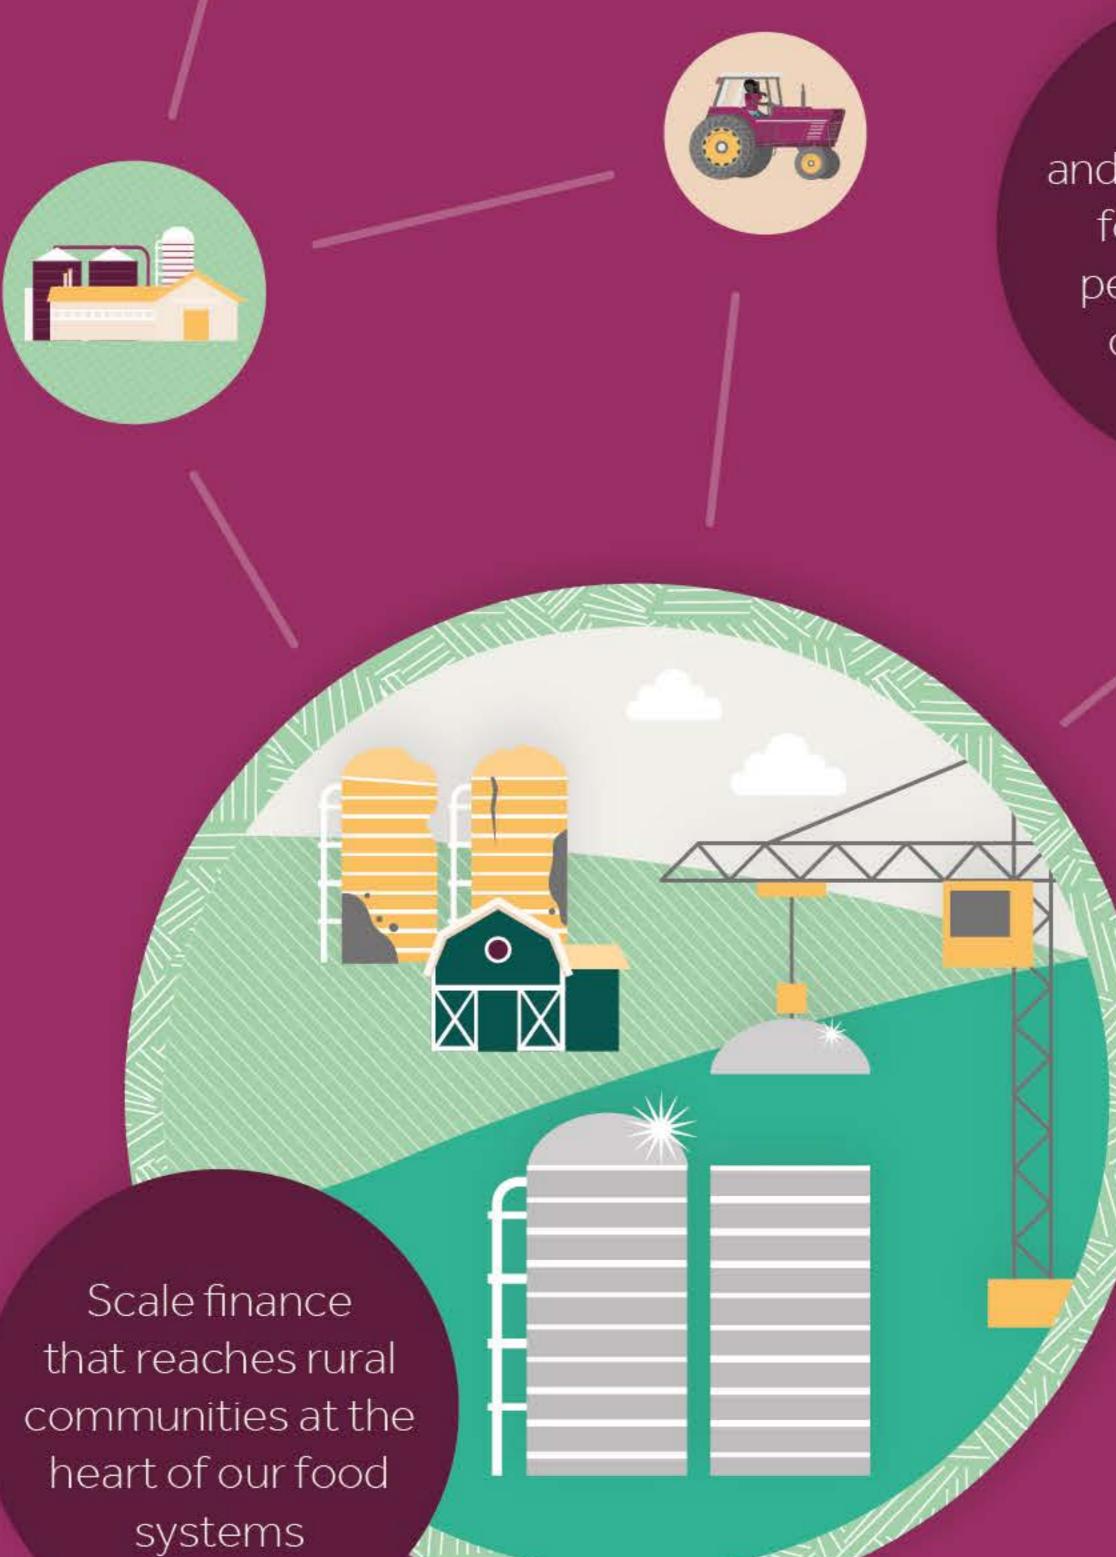

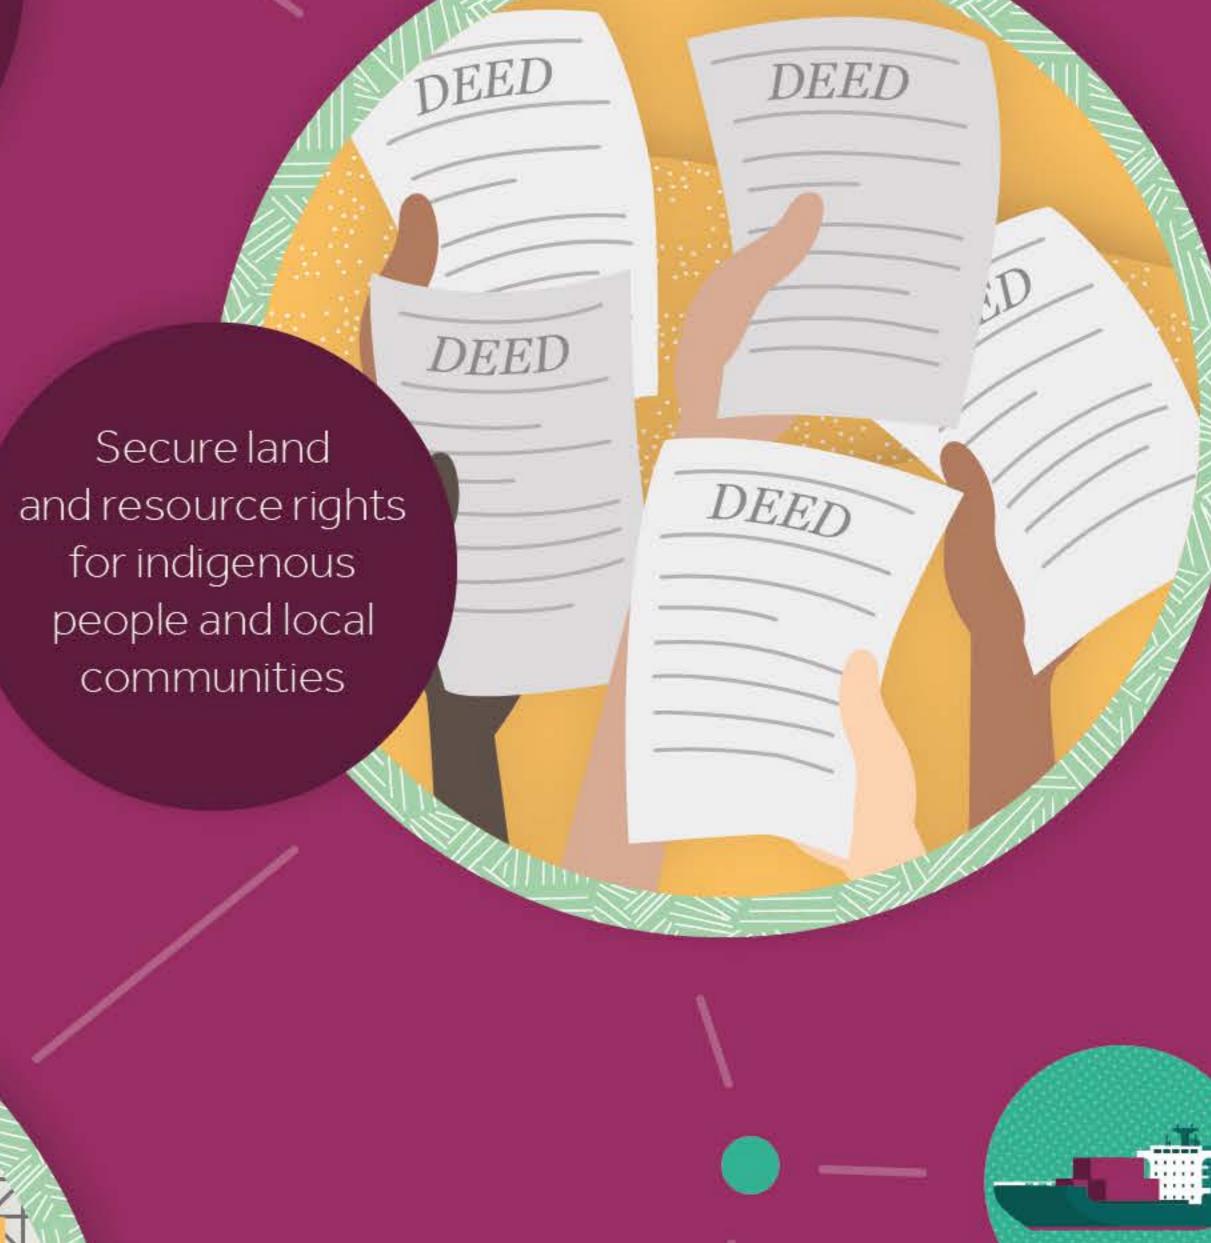

RI 3/16/2/2

Join the Just Rural Transition
